## INTRO

I am capable, determined and a fast learner. I love the magic of writing code and seeing it transformed into something visual and tangibly accessible.

I believe I have the skills, ambition and enthusiasm to learn, grow and thrive as a dedicated and successful web developer.

I am keen to pursue a full stack role using JavaScript and PHP, React and Laravel.

- View app [here](#)

## EXPERIENCE

### FULL STACK DEVELOPMENT

(2020 - Present)

Completed an intense 3 month bootcamp with DevelopMe\_, covering the full software delivery lifecycle from requirements gathering, development to later testing and deployment of full stack web applications using Laravel and React. Worked independently and collaboratively, delivering two team projects using Gitflow.

- Front: HTML, CSS, Sass, JavaScript, React, Redux.
- Back: PHP, Laravel, Node.
- Testing: Jest, PHPUnit.
- Tooling: Git, Gulp, AWS EC2, Vagrant, Heroku, Linux, npm.
- Contributor to Neu UI open source React component library.

### BUSINESS DEVELOPMENT CONSULTANT

FirstWord (January 2018 - February 2019)

Combined strong communication skills, initiative and diligence to consistently meet targets and expand business in this client facing role.

- Developed working relationships with prospective clients, while maintaining existing client relationships.
- First port of call for client queries, requests and issues.
- Listened to client needs in order to provide efficient, suitable solutions.
- Articulated complex products and services in a clear and concise manner.
